

Mt. Washington Landslide Mitigation

Public Meeting #1

Question and Answer Log

Project Street: Greenleaf and Reese Streets

March 23, 2022

1. **Question:** With the work not beginning until 2023; Is the city looking into things that could be causing these issues further, such as illegal dumping, tree cutting, and roof drainage up the hill and how things might change before work even begins?
Response: While we (DOMI) cannot predict how things will move in the future; we will be doing as much as we can with the funds that are available to us. We are attempting to advance our plans as quickly as possible to put remediations in place before things change. We are attempting to address the areas most in need of work at this time.
2. **Question:** Do you expect the Reese Street slide to affect Grandview Towers in any manner?
Response: No, the slide as identified is relatively far away from the Towers. All of Mt. Washington is a landslide prone area but the area, we are currently dealing should not affect the Tower, which are situated on a very deep foundation.
3. **Question:** Is planting native plants and grasses part of the scope of this work?
Response: Yes, landscaping is part of our plan. Our goal is to have as much green infrastructure as possible.
4. **Question:** Are there any plans to expand the bottom of Greenleaf Street to make the road more passable?
Response: Our current scope does not include any plans to modify Greenleaf Street.
