Penn Avenue Phase II is a project constructing streetscape improvements along Penn Avenue from Evaline Street to Graham Street. Following Phase I (Mathilda Street to Evaline Street), the project will include the construction of new sidewalks, curbs, and roadway. New traffic signals and roadway lighting will be installed, street trees will be planted, and sidewalk bumpouts are planned at the intersections for pedestrian safety.

The purpose of this rehabilitation is to enhance the corridor for pedestrian and vehicular travel alike. The improved sidewalks and crosswalks will provide an added component of safety to for residents and customers walking on the street, and bumpouts constructed at intersections will assist in the calming of traffic and will shorten pedestrian crossing distances.

In addition to updating infrastructure, the design of this project is intended to improve the sense of community among the residents in Bloomfield and Garfield, while benefitting businesses by creating an inviting streetscape for pedestrians and customers.
